

canopia

Welcome!

Canopia's wine selection includes labels from different countries, regions, styles and varietals, emphasizing in biodynamic, organic and natural.

Our cuisine offers a nice simple blend of refined flavors that come from only working with high quality local and seasonal products.

Siqe is an experimental bar with specialty coffee, herb based mixology and its own mezcal brand.

We are two different projects sharing a space, in which you'll find your senses touched by our curation in a timeless experience.

ORGANIC WINE

It is made without the use of chemicals in the vineyards, while the vinification process must take place with a limited use of certified sulphites and oenological organic products

BIODYNAMIC

It incorporates ideas about a vineyard as an entire ecosystem, and also takes into account things such as astrological influences and lunar cycles

NATURAL WINE

It is the unfiltered and untamed version of what we know to be wine. In most cases, natural wine doesn't look or taste like a typical wine. In fact, some natural wines taste more like a sour beer or kombucha

ORANGE WINE

This is a white wine that's made like a red wine where the skins and seeds stay in contact with the juice during the fermentation. Orange wine uses ancient techniques

APEROL SPRITZ 170

ST. GERMAIN SPRITZ 260
