

No Early Birds

Per Söderberg

## About the brand and its founder

*No Early Birds* was founded by designer and architect Per Söderberg in 2010.

Per holds a master in design from Domus Academy in Milan. His design and architect studio is based in Stockholm and since the start in 1997 he has made numerous prestigious designs, interiors and buildings in Sweden as well as abroad.

By founding the furniture brand *No Early Birds*, Per wanted to do something that felt authentic, real and personal. By being both the designer and the producer I do not have to compromise and can thus be true to my visions, says Per.

Everything is produced in Sweden by skilled craftsmen and with care for the environment.

The now iconic cross-leg is the most striking feature of *No Early Birds*. Together with the unique fixing system it makes the collection flexible and recognizable. The interesting and beautiful colors and materials gives the furniture a sophisticated and timeless expression.

In 2021 Per is introducing *PS Bespoke*, a new line of furniture in a limited edition that is a play with form and volume and that uses only but a few high quality materials including Italian Calacatta marble, American walnut and Swedish leather from Tärnsjö garveri.
