

Versa Spa Self Tanning With Voice Guided Prompts
Natural looking tan in less than two hours

1. Preparing for a Natural-Looking Spray Tan —
Add Perfector! Perfector is an add-on service that is applied during your in-salon spray tan session. Perfector balances your skin's pH level and conditions the skin to counter orange undertone, accelerate development time and intensifies the tanning results of your professional spray tan.
2. Choose Your Spray Tan Intensity From a subtle tan to looking like you just came back from an island vacation (Levels 1,2,&3)
3. Lock-In Your Spray Tan — Add Moisturizer!
Moisturizer is an add-on option that is applied at the end of the spray tan session for immediate hydration that will enhance your tan. Moisturizing is key to having a long lasting, natural-looking tan that will not fade too quickly.

How Much Does a Spray Tan Cost?

BODY

Perfector, Tan, & Moisturizer	\$40.00
Perfector, Tan	\$30.00

ABOUT THE VERSA SPA

VersaSpa® Spray Tan System provides a premium in-salon spray tanning experience with **3 spray nozzles for even, full-body coverage**. The open spray tan booth provides a comfortably

heated environment and an easy and relaxing experience, resulting in a beautiful, professional spray tan

2-4 Hours

Results in as little as 2 hours with Perfector

4-6 Hours

Results in about 6 hours without Perfector

Why VersaSpa?

- Tanning solutions **infused with marine algae** detoxify, firm, and rejuvenate the skin
- Breakthrough technology helps eliminate unpleasant odor commonly associated with sunless tanning
- Perfector and Moisturizer options to hydrate the skin and extend your professional spray tan
- Gluten Free • Paraben Free • Cruelty Free • Non-Comedogenic product

Spray Tan Ingredients

Premium, Professional-Grade Ingredients

Eco-certified **Dihydroxyacetone (DHA)** is the active ingredient most often used in sunless tanners. It's usually derived from plant sources like beets or sugar cane. The DHA in VersaSpa is provided by the #1 supplier in the world and is certified by a third party. This assures purity and quality.

Eco-Certified Erythulose is a naturally-derived, active ingredient in VersaSpa products. Erythulose gives an extra pop of color around 24 hours after tanning, allowing the tan to last longer. All

Dimethyl Isosorbide (DMI) helps the tan solution properly absorb into the skin for a deeper, even tan.
